Ø=ÜÝ Section-by-Section Notes

1. multilevel queue and multicore processing scheduling. We have integrated coverag

- multilevel queue and multicore processing scheduling. We have integrated coverage of NUMA-aware scheduling issues throughout, including how this scheduling affects load balancing.

+P Important Facts & Formulas

- New coverage combines discussions of round-robin and priority scheduling, heterogeneous multiprocessing, and Windows 10 scheduling.
- Chapter 6: Synchronization Tools(previously part of Chapter 5, Process Synchronization) focuses on various tools for synchronizing processes.
- Chapter 7: Synchronization Examples(previously part of Chapter 5, Process Synchronization) introduces classical synchronization problems and discusses specific APIsupport for designing solutions that solve these problems.

Ø<ß¯ Key Takeaways

1. New coverage combines discussions of round-robin and priority scheduling, heterogeneous multiprocessing, and Windows 10 scheduling.

2. Chapter 6: Synchronization Tools(previously part of Chapter 5, Process Synchronization) focuses on various tools for synchronizing processes.

3. Chapter 7: Synchronization Examples(previously part of Chapter 5, Process Synchronization) introduces classical synchronization problems and discusses specific APIsupport for designing solutions that solve these problems.

Ø=ÜÌ Exam Tips

- Review each definition and be able to explain it in your own words
- Focus on the formulas and relationships between concepts
- Practice writing short answers for each major topic
- Create your own examples for abstract concepts
